Note:

\* Meter Reading Fee for a Self-Selected Switch only applies when an Actual Meter Reading is required and the meter reading is on a date other than the Schedule Reading Date for the purpose of switching on a date certain. The fees included in this table are applicable for both Residential and Small Business customers. Both residential and small business customers can have either self-contained meters or CT/Other meters. But most residential customers use self-contained meters, while residential and small business customers with large energy usage use CT/Other meters.
